

ESABII Side Event at the CBD COP11

16 October 2012, Hyderabad, India

East and Southeast Asia is one of the richest biological diversity areas on the earth. However, information and knowledge on biodiversity in this region are still limited.

“East and Southeast Asia Biodiversity Information Initiative (ESABII)” was launched by 14 countries in this region and relevant organizations to achieve goals of the Convention on Biological Diversity (CBD) through development of biodiversity information and taxonomic capacity building.

This side event will be a unique opportunity to share the achievements and future plans of ESABII activities toward the implementation of the CBD.

Organizer Ministry of the Environment of Japan (ESABII Secretariat)

Date 13:15 - 14:45, Tuesday, 16 October, 2012
