

TRAFFIC Recommendations on the Proposals to Amend the CITES Appendices at CoP15

	Species	Comment	Recommendation
22	<i>Operculicarya decaryi</i>	<p>CoP15 Prop. 22 [Madagascar]. Inclusion in Appendix II.</p> <p>This plant species, sometimes known as jabily, is locally very abundant in Madagascar with populations estimated to be in the millions. Recorded trade levels are reportedly not having a deleterious impact on wild populations. In addition, this species is easily propagated from cuttings. Based on available information this species does not meet the criteria for listing in CITES Appendix II.</p>	REJECT
