TRAFFIC
the world's trade monitoring authority

WWF

TRAFFIC, the wildlife trade monitoring network, is the leading non-governmental organization working globally on trade in wild animals and plants in the context of both biodiversity conservation and sustainable development. It is a strategic alliance of WWF and IUCN.

TRAFFIC was established in 1976 and has developed into a global network, research-driven and action-oriented, committed to delivering innovative and practical conservation solutions based on the latest information

MISSION STATEMENT

TRAFFIC, the wildlife trade monitoring network, works to ensure that trade in wild plants and animals is not a threat to the conservation of nature.

TRAFFIC'S VISION

TRAFFIC's vision is of a world in which trade in wild plants and animals is managed at sustainable levels without damaging the integrity of ecological systems and in such a manner that it makes a significant contribution to human needs, supports local and national economies and helps to motivate commitments to the conservation of wild species and their habitats.

REPORTS

Assessing the Trade in Pig-nosed Turtles *Carettochelys insculpta* in Papua, Indonesia.

www.traffic.org/species-reports/traffic_species_reptiles39.pdf

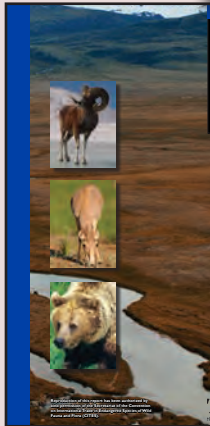

Elizabeth A. Burgess, Ron Lilley.

October 2014. 29pp

ISBN 978 983 3383 43 5

Published by: TRAFFIC

The high international demand for Pig-nosed Turtles in the exotic pet trade, food market and traditional medicine practices has driven the intensified exploitation of this species in Papua. This study highlights an urgent need for the existing laws and regulations concerning Pig-nosed Turtle trade to be rigorously enforced to curtail the illegal harvest and trade.

David Mallon

2013. 48pp.

ISBN 978 2 930490 16 8

Edition: English and Russian

Published by: CITES Secretariat and TRAFFIC

The document has been compiled as part of a project, which aims to strengthen capacities to implement the Convention on International Trade in Wild Fauna and Flora (CITES) especially in Central Asia and to prevent overexploitation and to ensure legal international trade.

in wild fauna and flora does not exceed sustainable levels.

Vital but Vulnerable: Climate Change Vulnerability and Human Use of Wildlife in Africa's Albertine Rift.

(PDF, 5.79MB)

www.traffic.org/non-traffic/SSC-OP-048.pdf

J.A. Carr, W.E. Outhwaite, G.L. Goodman, T.E.E. Oldfield and W.B. Foden

2013. 240pp.

ISBN: 978-2-8317-1591-9

Published by: IUCN, Gland, Switzerland

This document builds upon much of the work already undertaken in the Albertine Rift region, particularly efforts to catalogue the vast diversity of species present, as well as those to assess the risk of extinction faced by many species. In this timely and comprehensive assessment of 2,358 of the region's species, IUCN and TRAFFIC have gathered a wealth of information.

ISBN 978 1 85850 252 6

Edition: French

Published by: TRAFFIC International

A publication on the development of a Central African bushmeat monitoring system.

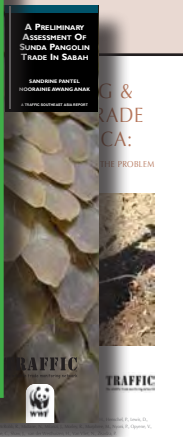

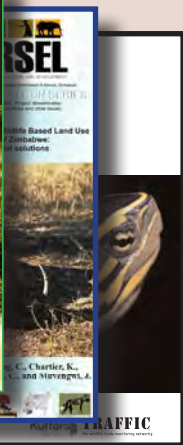

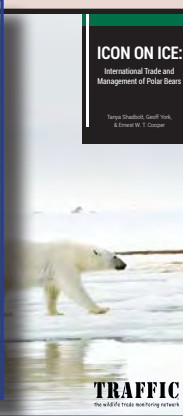

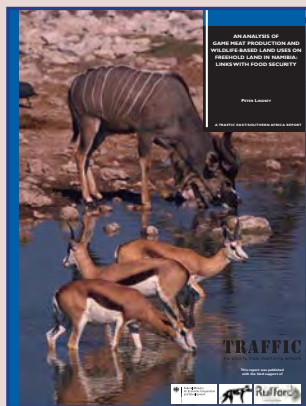

Pills, Powders, Vials and Flakes: The Bear Bile Trade in Asia

(989 KB)

www.traffic.org/species-reports/traffic_species_mammals65.pdf

Kaitlyn-Elizabeth Foley, Carrie J. Stengel, Chris R. Shepherd

2011. 67pp.

ISBN 978 983 3393 33 6

Published by: **TRAFFIC Southeast Asia**

The results from TRAFFIC's recent surveys indicate that the presence of bear farms in a country is clearly correlated with a country being both a producer and a consumer of bear bile products with the exception of the Republic of Korea, where it is only correlated with being a consumer. The overall results of this study indicate there is a substantial amount of bear bile products in Asia. In this report TRAFFIC recommendations support the conservation of wild bear populations.

The Trade in South-East Asian Python Skins

<http://www.intracen.org/The-Trade-in-South-East-Asian-Python-Skin/>

Wildlife Trade Control: CAFTA-DR Regional Gap Analysis Report

http://www.traffic.org/general-reports/pub_gen_31.pdf

April 2009. 45pp.

Published by: TRAFFIC North America

This report attempts a "gap analysis" related to priority issues concerning implementation of wildlife trade controls, including for several species targeted for meat, in the CAFTA-DR (Central America–Dominican Republic–USA Free Trade Agreement) region.

Status, Trade Dynamics and Management of the Southeast Asian Box Turtle in Indonesia

(2.3 Mb)

http://www.traffic.org/species-reports/traffic_species_reptiles19.pdf

Sabine Schoppe

February 2009. 90pp.

ISBN 978 98333 932 13

Published by: TRAFFIC Southeast Asia

The Southeast Asian Box Turtle is a heavily traded species, used for meat. In this report, it is the focus of a case study for science-based management, which could serve as a model for other CITES Appendix-II species in trade. The study aims to assess the legislation in place to regulate trade in freshwater turtles and tortoises, and to identify past and current harvest and trade levels.

The Illegal Trade in Wild Birds for Food Through Southeast and Central Europe

(600 Kb)

http://www.traffic.org/species-reports/traffic_species_birds2.pdf

November 2008. 6pp.

Published by: TRAFFIC Europe.

The hunting and smuggling of song birds for food is an issue of serious conservation concern in Europe, but one which, to date, has received insufficient attention. It involves highly organized criminal activity in South-east and Central Europe: hunters are illegally shooting birds and smuggling them to northern Italy and Malta, where they are consumed as a delicacy.

Science in CITES: The Biology and Ecology of the Southeast Asian Box Turtle *Cuora amboinensis* and its Uses and Trade in Malaysia

(2.4 Mb)

http://www.traffic.org/species-reports/traffic_species_reptiles18.pdf

Sabine Schoppe.

November 2008. 56pp.

ISBN 978 98333 931 83

Published by: TRAFFIC Southeast Asia.

The Malayan Box Turtle is a subspecies of the widespread Southeast Asian Box, which is considered the commonest freshwater turtle in South-East Asia, but despite this, and even its tolerance of man-made artificial habitats, the species is in peril owing to over-exploitation. Consumption for food was reported as a common use.

The State of Wildlife Trade in China: Information on the Trade in Wild Animals and Plants in China 2007

(2.3 Mb)

http://www.traffic.org/general-reports/traffic_pub_gen26.pdf

Edited by Xu Hongfa, Craig Kirkpatrick.

November 2008. 35pp.

Published by: TRAFFIC East Asia

Contains an article on wild meat trade in southern China, on trade in freshwater turtles for meat in Guangzhou, and an article on understanding the motivations for wildlife consumption.

What's Driving the Wildlife Trade? A Review of Expert Opinion on Economic and Social Drivers of the Wildlife Trade and Trade Control Efforts in Cambodia, Indonesia, Lao PDR and Vietnam

Rob Barnett, Claire Patterson.

October 2006. 115pp.

ISBN 0 98025 420 5

ISBN 978 0 98025 420 4

Published by: TRAFFIC East/Southern Africa

An overview assessment of the sport hunting industry, often linked to supporting the livelihoods of Africa's rural poor, in the SADC region

Bear Necessities: an Analysis of Brown Bear Management and Trade in Selected Range States and the European Union's Role in the Trophy Trade

(4.5 Mb)

http://www.traffic.org/species-reports/traffic_species_mammals8.pdf

Amelie Knapp.

2006. 76pp.

ISBN 2 96005 052 5

ISBN 978 2 96005 052 3

Published by: TRAFFIC Europe

This report analyses the international trade in Brown Bear trophies and the role the EU plays in this trade, and includes reference to imports of bear meat to the EU.

N.B. TRAFFIC has several publications on bear trade, but only the most recent are listed here, as use of bears as human food is limited.

The Call of the Wild: Captive Crocodilian Production and the Shaping of Conservation Incentives

(438.33 KB)

http://www.traffic.org/species-reports/traffic_species_reptiles11.pdf

James MacGregor.

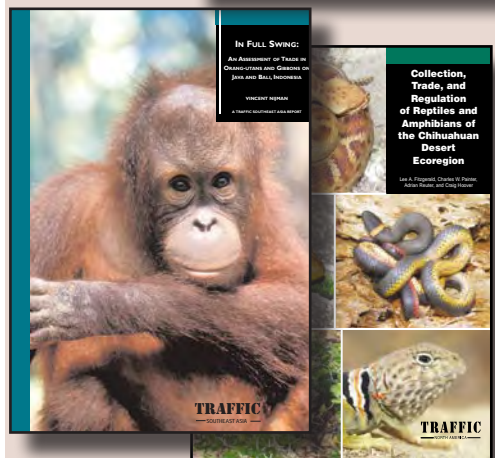

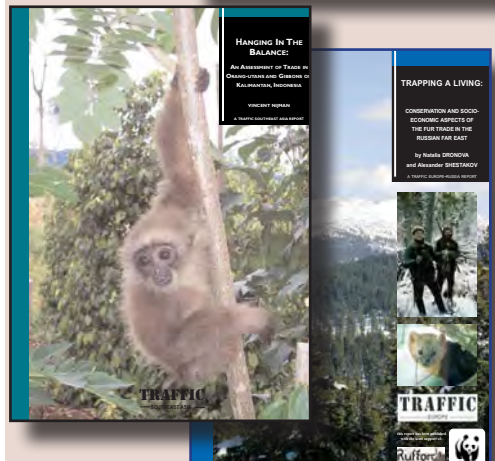

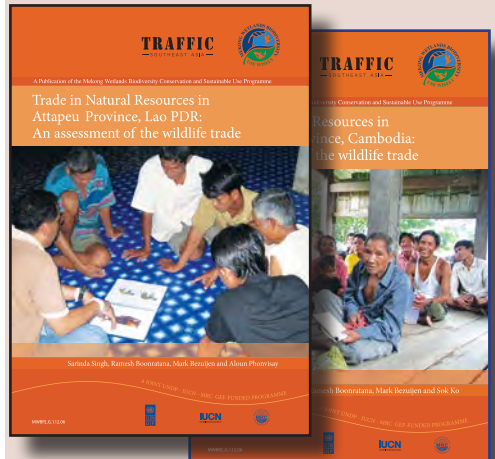

June 2006. 49pp.

ISBN 1 85850 220 9.

ISBN 978 1 85850 220 5.

Published by: TRAFFIC International

A report documenting links between crocodilian conservation and the economics of trade in crocodilians, including reference to sales of crocodilian meat and their enhancement of the profitability of crocodilian farms.

Trade in Natural Resources in Attapeu Province, Lao PDR: an Assessment of the Wildlife Trade

Executive summary (900 Kb)
http://www.traffic.org/general-reports/traffic_pub_trade13.pdf

Sarinda Singh, Ramesh Boonratana, Mark Bezuijen, Aloun Phonvisay.

2006. 92pp.

Published by: TRAFFIC & MWBP.

Includes information on 1230 species of reptile, 433 species of mammal and 1212 species of bird taken by just two villages, often for food.

Trade in Natural Resources in Stung Treng Province, Cambodia: an Assessment of the Wildlife Trade

Executive summary (708 KB)
http://www.traffic.org/general-reports/traffic_pub_trade12.pdf

Sarinda Singh, Ramesh Boonratana, Mark Bezuijen, Aloun Phonvisay.

2006. 92pp.

Published by: TRAFFIC & MWBP

Report documenting use and trade of wildlife, including for meat. Interviewees in one village reported eating wild meat "about once or twice a month".

熊胆
麝香
犀角
虎骨

Hanging in the Balance: an Assessment of Trade in Orang-utans and Gibbons on Kalimantan, Indonesia

(572 Kb)
http://www.traffic.org/species-reports/traffic_species_mammals1.pdf

Vincent Nijman.

August 2005. 44pp.

ISBN 9 83339 303 9.

ISBN 978 9 83339 303 9

Published by TRAFFIC Southeast Asia

This report presents an assessment of the trade in gibbons and orang-utans in Kalimantan, in parts of which orang-utan meat is preferred over other types of meat.

Trapping a Living: Conservation and Socio-Economic Aspects of the Fur Trade in the Russian Far East

(1.1 Mb)
http://www.traffic.org/general-reports/traffic_pub_gen10.pdf

Natalia Dronova, Alexander Shestakov.

July 2005. 49pp.

ISBN 2 96005 051 7.

ISBN 978 2 96005 051 6

Published by **TRAFFIC Europe**

This study reviews socio-economic trends and aspects of hunting in the Russian Far East, to explore what role recent socio-economic changes might have played in the exploitation of wildlife species of conservation concern.

In Full Swing: an Assessment of Trade in Orang-utans and Gibbons on Java and Bali, Indonesia

(1.1Mb)

http://www.traffic.org/species-reports/traffic_species_mammals2.pdf

Vincent Nijman.

June 2005. 49pp.

ISBN 9 83339 300 4.

ISBN 978 9 83339 300 8.

Published by: TRAFFIC Southeast Asia

This report presents an assessment of the trade in seven species of gibbon and two species of orang-utan on the island of Java and Bali, including reports of the (rare) use of these animals for meat and medicine.

Collection, Trade, and Regulation of Reptiles and Amphibians of the Chihuahuan Desert Ecoregion

(1.6 Mb)

http://www.traffic.org/species-reports/traffic_species_reptiles1.pdf

Wild Meat and Food Security in Refugee Hosting Areas

(PDF 197 KB)

http://www.traffic.org/species-reports/traffic_pub_gen35

George Jambiya, Simon Milledge,

Wild Meat and Food Security in Refugee Hosting Areas

Jambiya, G., Milledge, S.A.H., Mtengo, N. and Hurst, A.

Reconciling development and conservation imperatives is particularly prominent in refugee situations in north-western Tanzania, where the needs of vulnerable host-towns and diminishing wildlife populations need to be addressed together. © TRAFFIC 2008

Since 1993, Tanzania has been host to one of the largest concentrations of refugees in the world and certainly the largest population within Africa. Refugee numbers peaked at 500 000 but have since reduced to around a half million people. Tanzania is also one of the world's most resource-rich countries, with bountiful wildlife and diverse ecosystems. The close proximity of wild animals to large refugee populations has had significant conservation implications.

Tanzania hosts the largest refugee population in Africa, around 500 000, almost two-thirds of them residing in formal refugee camps.

Focusing on north-western Tanzania, a recent study¹ by TRAFFIC was a first attempt to understand the conservation and livelihood implications of wild meat use in refugee situations. The report's findings suggest the need for a broader range of policy and programme responses that address the root causes and drivers of wild meat use. With a more expansive approach, it may be possible to balance the food security and livelihood needs of both refugees and local communities while also ensuring the stability of adjacent wildlife populations.

Demand for wild meat has been driven partly by insufficient refugee food rations that fail to supply any meat protein whatsoever.

Refugees have been criminalized for seeking to secure what is regarded as an essential part of the local diet.

The illegal harvest and trade of wild meat has led to serious wildlife declines and represents lost development opportunities for Tanzania.

¹Jambiya, G., Milledge, S. and Taylor, B. (2007) Wild Meat: The Species Conservation and Livelihood Implications of Wild Meat Use in Refugee Situations in North-Western Tanzania. TRAFFIC East/Southern Africa, Box 44, Salazar, Swaziland. ISBN: 995-1-55660-231-1

Serious wildlife declines

The demand for wild meat has caused wildlife populations to plummet in areas surrounding refugee camps. Within less than a year of an influx of refugees in Kagera in mid-1994, poaching escalated to a massive scale. It was estimated that about 7.5 tons of wild meat, equivalent to 60 wild animals, were illegally hunted and supplied to the two main refugee camps of Benaco and Kilele Hill each week, where up to 450 000 refugees were hosted.

A comparison of wildlife surveys suggests some species declined by 60-90% in nearby protected areas between 1990 and 1998. In Burigi and Biharamulo Game Reserves, many large herbivores such as Buffalo *Syncerus caffer*, Eland *Taurotragus oryx* and Sable Antelope *Hippotragus nigri* declined. In the Moyowosi and Kigosi Game Reserves, species declines were recorded for Hippopotamus *Hippopotamus amphibius*, Common Zebra *Equus burchelli*, Roan *Hippotragus equines*, Sable Antelope and Sitatunga *Tragelaphus spekei* amongst other species. In all cases, illegal hunting for wild meat was identified as the primary cause of decline.

In Gombe National Park, decreasing numbers have been noted for several wildlife species including Buffalo, Zebra, Bushbuck, *Procapra scriptus* and Darker *Cephalophus* spp. Available evidence also indicates a significant decline in Gombe's Chimpanzee *Pan troglodytes* population in the southern portion of the park, where nearby villages have large Congolese immigrant populations which traditionally eat primate meat.

Poaching for wild meat has led to a serious decline in chimpanzee numbers in Gombe National Park.

wanted, alive or dead!

Pangolins are the most commonly traded mammals in this region. It is estimated that over 200 tons of pangolins and body parts have been illegally traded across Asia.

Many shipments of pangolins have been seized by the authorities but they represent only a small fraction of the total illegal trade.

Customs officers inspecting pangolins seized at Bangkok airport.

THE RECENT SEIZURES INCLUDE:

- 68,000 kg of pangolin meat, 900 kg of scales, and 2,849 pangolins seized in Nov 07. 5 people were charged in the Fujian Province of China.
- 275 live pangolins seized near the Laos border in Jan 08
- 23 tons of slaughtered pangolins seized in Vietnam in Mar 08
- 98 live pangolins seized in Penang, Malaysia in April 08
